SYNOPSIS

- Around 2.5 years of experience in area of Java programming.
- Good technical skill in Core java and Spring functionalities.
- Having a good communication with the clients in gathering the requirements. And also completed a couple of six-sigma Kaizen's (Value innovations) in the application functionality process improvement.
- Worked in diverse technologies like Java, J2EE (Springs, Servlets and JSP), Java Script and. Hands on experience of using HTML, Java Script and for Web Pages designing.
- Worked on **Service Now** Application for handling different types of tickets like Incident tickets, Problem tickets, Change tickets.
- I have smart thinking capabilities and quick learner. I am adaptable to different kind of environments and always try to be standing in front to lead and maintain team effort.

TECHNICAL EXPERTISE

- Programming Skills: C, Java (+ JSP, Servlets, Spring 3.0, Struts 2.0, Hibernate) Jquery, JSON.
- Databases: SQL Server, Oracle
- Mark up Technologies: HTML, XML
- Web/App Servers   Jboss
- Tools and IDEs: Eclipse(+Maven configurations)
- Repository tool: SVN.

CAREER PROFILE

IGATE Global Solutions, Hyderabad.
Role: Senior Software Engineer
Period: Nov 2011 - till date

PROJECT

1. Fairfield Occupancy Registry

- Type   Rewrite ASP to JAVA
- Language   JAVA, PL/SQL,
- Database   SQL Server 2012
- Platform   JAVA/ Windows
- Tools   Eclipse 3.2 and Galileo
- Server   IIS6.0 and JBoss 4.3
-
- This application is used to keep registry of space allocated to GE employees in Fairfield. Space assigned, security, badges for access, extensions, vehicle parking space. All this stuff is registered in this application.

Responsibilities:
- This is my first project for development (Fairfield Occupancy Registry rewrite from ASP to JAVA Spring Framework).
- Fairfield Occupancy Registry is a project which is based on space management and security access provided to GE Corporate. This project was rewrite and development in spring with annotations. This includes understanding requirement, coding, testing.
- Involved in development of Facilities, telecom, setup modules. Getting data from database using JdbcTemplate. Displaying the data, using datatables of jQuery. Also involved in developing Search facilities for the space requests, add section for space requests.

2. Batch Job Monitoring tool

- Type   Development
- Language   JAVA, PL/SQL
- Database   Oracle 10g
- Platform   JAVA / Windows
- Tools   Eclipse(SpringSourceTool-2.9.1)
- Server   JBoss 4.2

Responsibilities:

- Batch job monitoring tool is a dashboard which tracks the status of the jobs. In order to track the status of the job, a job is registered in the application. It provides a unique rest service URL for that job. URL is used to update the status of the job in the dashboard. This tool is a centralized monitoring tool, which tracks status of a wide variety of jobs scheduled on different schedulers.

3. Insurance Portal & Integration

- Type   Production Support, Enhancement and Testing
- Language   JAVA, PL/SQL
- Database   SQL Server 2005
- Platform   JAVA/ Windows
- Tools   Eclipse 3.2 and Galileo
- Server   IIS6.0 and JBoss 4.0

Responsibilities:

- Insurance Portal is a project which is based on insurance services provided to GE Corporate. This project is to support application related to insurance, policies and acquisition. The core responsibility in this project is to support the application in production environment. In case if user is facing any issue; I need to classify the issue as it could be a new requirement or an application issue or an inquiry request or general service request. After that the request is prioritized. If the request is an enhancement request I'm the responsible resource to provide feasibility, estimation, code development and versioning. After these steps the developed code is deployed into development environment and tested. Now the application is tested by third party tester and if everything works well and after getting QA signoff, we deploy the application on production environment.

4. V1Reports

- Type   Production Support, Enhancement and Testing
- Language   JAVA, PL/SQL
- Database   SQL Server 2005
- Platform   JAVA/ Windows
- Tools   Eclipse 3.2 and Galileo
- Server   IIS6.0 and JBoss 4.0

Responsibilities:

- This project is based on JAVA/J2ee. V1Reports is a reporting application that generates reports for based on the information available regarding the meetings arranged. This project is to support application related to budgeting of the meetings. This includes providing support to client, analysis, estimation, design, coding, testing and executing enhancements (Both DB as well as Application side). This role also include weekly status report and meeting with application owner.
